DUE TO THE EXTENSIVE RANGE OF THE FOLLOWING PRODUCTS WE HAVE PLACED THEM IN SEPARATE CATALOGUES:- WATER SPORTS, DIRTY DOG, CEBE & SUNWISE. PLEASE CONTACT SALES FOR COPIES.		

Extreme Sports Protection

SPORTVIZ OTL GOGGLES meet the demands of the extreme sports enthusiast for paintballing and motocross at ground level to skydiving and paragliding up above. All your eyes need for a days activities in the great outdoors. For vision correction the Sportviz custom prescription clip is switchable between all Sportviz and Aquaviz styles.

OTL2 - Ansi Z-87.1 and CSA Z-94.3 impact rated mask for exceptional protection with 2.2mm wide angle Polycarbonate lens giving full UV protection with anti-scratch coated

exterior/fog resistant interior lens surfaces. Multi-layer face foam is moisture resistant and ensures a perfect fit. Adjustable double-buckle woven strap with non-slip silicone grips ensure mask stays securely in place even when worn with a helmet. Includes microfibre pouch, cleaning cloth and protective case. Available in lens colours Clear, Smoke or Yellow.

OTL Lightweight and pliable TPU frame for great protection, comfort and durability. Incorporates scratch and fog resistant clear UV protected polycarbonate lens *with integral tear off posts*. The hypoallergenic triple layer foam ensures an excellent fit. Includes adjustable double-buckle woven strap with non-slip silicone grip, microfibre pouch, detachable noseguard, storage case & starter pack of 10 tear-off strips. Frame colours Orange or Blue.

Fishing

one of the most popular sports/pastimes

Supreme

This aviator style gives a wide distortion free field of view. Available in frame sizes 52 & 54 in Gold, Gunmetal or Bronze. Supplied with neck cord and case.

Henley

Floatable wrap-around frame with broad sides to protect from wind and dust. Head hugging sides ensure a comfortable fit and vents reduce misting. Supplied with Arena 8 base Sports lenses and neck cord. Size: 64 x 17

Reel

A large, light and comfortable plastic frame which comes with removable shields to protect from wind and dust.

Size: 59 x 15 Colour: Brown

To cope with changing weather conditions and reflected glare the correct lens choice is important. Yellow and amber colours filter blue light, give enhanced contrast and are also available in our SF-Sport photochromic form. On dull days yellow increases perception and may extend the useable daylight hours. Both colours are available in polarised form to reduce surface reflections and Drivewear lenses have the added advantage of coping with changing light conditions. Other lens colours and styles including bifocals and progressives are possible.

NOTE: OTHER FRAMES IN THIS CATALOGUE MAY BE SUITABLE.

Shooting & Archery

Hotshot rimless offers a wide uninterrupted field of view for those who find a rimmed frame distracting.

Menrad Sports

(the original Zeiss Gold Cup)

This hugely popular frame has an updated shape for wider vision. An adjustable bridge and curl sides ensure an accurate fit.

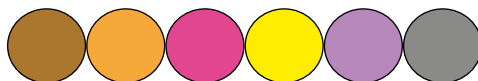

Commander

Classic Aviator sports frame in Black, Brown or Gold.

Supplied with Zip Case, Cloth and Cord.

Sizes 54 x 17, 58 x 17, 61 x 17.

Supplied with Polycarbonate or Trivex ARENA SPORT prescription lenses in these recommended colours.

Custom colours are possible and other lens styles are available.

NOTE: OTHER FRAMES IN THIS CATALOGUE MAY BE SUITABLE.

Golf

Golfers require unimpeded vision looking downwards and along the green. Thin metal rimmed frames and half rimmed styles are very popular and wrapped frames give greater protection from wind and dust. A few examples from the Dirty Dog range are shown here.

DirtyDog SLY

Finding a single lens style that suits changing weather conditions can be a challenge. Photochromic lenses are beneficial in changing light conditions. Amber lenses will increase contrast on a dull day and green lenses allow for some contrast enhancement whilst retaining a more natural view of colours. Polarised lenses reduce reflected glare, especially helpful where there is water and Photo-Polarised lenses also allow for changing light conditions. See back pages for more information on colours and lens types.

DirtyDog STEED

DirtyDog STORM

The above frames are examples from the Dirty Dog range. Please ask for separate catalogue and price list. Other suitable frames can be found in this catalogue.

Cycling

There are many different cycling sports and pastimes, each presenting challenges for improvement of visual quality and eye protection. Protection from the elements is important and wraparound or side protection frames are an advantage. Peripheral awareness is vital to safety, especially in today's busy traffic environments, and broad sided styles may impede vision. Our frame and lens packages include products that solve these problems. ARENA prescription lenses can be glazed directly into many of the wrapped styles and for high prescriptions there are frames with prescription inserts.

Sunwise MONTREAL

Sunwise
AUSTIN

SUNWISE, DIRTY DOG and CEBE frames each have a wide choice of styles. For details please ask for the separate catalogues.

LEADER Rx Sports frames offer a unique range of styles which can be glazed directly to the frame either with 6 base standard lenses or ARENA 8 base wraps. Lens options are clear, coloured, polarised, photochromic and photo-polarised.

Leader BREAKAWAY

Snooker, Bowls, Pool, Billiards

More ways to pot the black or strike the pin
with these versatile frames.

EYE-CUE rimless frames stand up to heavy wear with Polycarbonate & Trivex lenses.
HURRICANE, ON-CUE and DENNIS TAYLOR frames are glazed with CR39 lenses as standard and can be supplied with other lens materials at extra cost.
For outdoor bowls photochromic lenses are recommended.

Safety Sports Goggles

Pages 9-19

Leader **ProX** Sports Goggle

FEATURES:- Adjustable temples & comfort bridge. Interchangeable headstrap and sides. Vented side ports to reduce fogging. Replaceable silicone-free nosepiece.

Easy switch between sides & full head strap

Skiing Snowboarding & Winter Sun

Our universal prescription inserts will fit a wide range of goggles and are available in three sizes - junior, medium and large. The flexible tentacles clip snugly into the front rim of the goggle ensuring a secure fit. Inserts can improve airflow over standard spectacles thereby reducing fogging. We can supply a complete package (see following pages) or we may be able to fit to your own goggle.

Ski /Snowboard Goggles

Bling

A close fitting goggle ideal for snow sports and many other activities.

6 base vented Rx adapter helps eliminate fogging. A foam gasket seals out the elements and conforms to the face for maximum comfort. Available in black or navy blue. 6 base

Ski-Patrol with insert

Small/medium sized mask. Camouflage finish with black adjustable head strap. Amber polycarbonate lenses with anti-fog coating enhance contrast and reduce misting. The custom prescription insert ensures a wide field of view.

Chameleon X400

A multifunction style with removable gasket secured by a patented micro-magnet system. Soft leather shields protect from light, wind and dust. Changes from mountain sport to streetwear by removing the gasket and changing the sides. **SIZE:** 60/35 x 17 **COLOUR:** Black

Sportviz ATS2 with insert

Small/medium sized mask in Orange or Blue with adjustable head strap. UV400 Amber lens with anti-fog coating enhances contrast and reduces misting. The custom prescription insert fits all of the Sportviz and Aquaviz range.

Ski /Snowboard Goggles

Complete with prescription insert and lenses

Sprayer - A smaller adult or teenage goggle with amber/copper lens to enhance contrast. Full UVA & UVB protection up to 400nm. Complete with Rx adapter, prescription lenses and microfibre bag

Slope - A large adult goggle with mirrored lens to enhance contrast in all light conditions. Full UVA & UVB protection up to 400nm. Complete with Rx adapter, prescription lenses and microfibre bag

Mogul - Large Adult Goggle with anti-fog dual lenses and moveable side hinges. Amber/Copper polarised lens to eliminate glare and enhance contrast in all light conditions. Custom Rx insert

Sportviz ATS Utilises the same Rx insert as the Aquaviz watersport range to enable switching between sport styles. The siliconised Azion headstrap keeps the goggle in place under extreme conditions. Supplied with a microfibre pouch and storage box. Available in white or black. One-piece visor gives 100% UV protection and is treated with anti-fog and scratch resistant coatings.

INFINITY SPORTS COLOURS (% ABS given)

The following standard colours will be given unless specified otherwise. We are also able to match your sample or vary the percentage absorption of the infinity sports range listed below.

DARK GREY 85% ABS - A neutral colour suitable for all outdoor sports giving sun protection whilst retaining natural colour balance.

DARK BROWN 85% ABS - blocks a high percentage of blue light. Gives enhanced contrast and reduces light levels in bright sunlight. Suitable for most outdoor sports.

DARK GREEN 85% ABS - Blocks out most blue light. Provides a more natural vision with excellent contrast between colours.

PALE YELLOW 10% ABS - Excellent for very dull low light conditions. Suitable for any sport where added contrast is needed both indoors and outdoors.

YELLOW 20% ABS - High contrast in poor light and filters blue light. For indoor and outdoor use. Popular for shooting, fishing, cycling and winter sports.

ORANGE 35% ABS - More subdued than yellow but still gives excellent contrast and blocks blue light.

AMBER 65% ABS - Gives improved contrast in brighter conditions whilst filtering blue light. Suitable for most sports activities and for daytime driving.

ROSE 70% ABS - Improves contrast by modifying greens and blues to give greater definition between colours. Popular with clay shooters. Reduces glare in snow conditions.

LIGHT PURPLE 40% - Dampens green and enhances orange for target shooting. Glare reducing in very bright snowy conditions and favoured by skiers.

DARK PURPLE 70% ABS - Excellent in very bright conditions for glare reduction and contrast of orange against green.

SF-PHOTOSPORT & OTHER PHOTOCROMIC LENSES.

TRANSITIONS Signature VII Grey & Brown

TRANSITIONS XTRActive Grey & Brown.

SF-PHOTOSPORT lenses with INFINITY SPORTS colours shown above and the following inactive absorptions - 15%, 25%, 50% or 75%. (Custom options are possible)

Polarised colours may be limited in some lens materials.

Rx LENS SELECTION - MATERIALS & STYLES

Where a prescription range is quoted the powers given are an estimate and higher powers may be possible. We are happy to quote you on those occasions. Lens materials will be supplied according to the use of the product and as available from our listed range.

PROTECTIVE GOGGLES are supplied with either trivex or polycarbonate safety lenses for optimum protection. These are available in clear, Infinity colours, photochromic, polarised and photo-polarised.

GENERAL SPORTS EYEWEAR (lower impact risk) - For durability and safety we supply these frames in either trivex or polycarbonate as standard. For higher prescriptions either 1.67 or 1.74 may be possible in certain lens types.

SPORTS WRAPS (Direct Glaze & base) - For glazing directly to the frame we can supply any of the lenses from the ARENA range. Please refer to the ARENA brochure for more information.

SPORTS WRAPS with Rx INSERT - Prescription lenses can be supplied in all plastic materials from 1.498 to 1.74 index depending on size etc.

MASKS & GOGGLES with Rx INSERT - Prescription lenses can be supplied in all plastic materials from 1.498 to 1.74 index depending on size etc.

SAFETY & QUALITY CONTROL.

Use of appropriate lens materials, special bevelling and strict production controls ensure that our protective sports eyewear is manufactured to a high standard.

NOTES ON ORDERING.

For the products shown in this catalogue we provide a full prescription service including frame at a competitive price. We do not sell empty frames for self glazing. Samples are available for review or fitting prior to placing an order and will be charged on a proforma basis for stock control purposes. We will not invoice you fully until the completed prescription order is despatched or unless the sample is not returned. For non return of samples where a prescription order has not been received we may charge a cost to cover admin and a reasonable margin. This process and associated charges may be modified for regular orders.
